

Youngchan Lee

Computer Science and Engineering (CSE)

Education

Seoul National University

Major: Computer Science and Engineering (CSE)

Skills

Programming	Python, C++, Java
Web	HTML, CSS, JavaScript
Tools	Git, GitHub, GitHub Pages
Concepts	Algorithms, data structures, dynamic programming

Projects

Wordle Solver

- Built a solver that narrows candidate words using feedback from each guess.
- Applied word filtering and scoring strategies to recommend efficient next guesses.

RNA Folding Project

- Implemented an RNA folding project using dynamic programming concepts.
- Modeled possible base-pairing patterns for RNA secondary structure prediction.
